

LOSE YOUR HEAD

I need to learn
When this thing called love
When it's a mirror, baby
Can you see all those parts of me
Broken across the world
I need to find some kind of peace of mind
It's a demon baby
When it comes like my oldest friend
Have you got a friend in the night

You say you miss me now
What a way to lose your head
You say you miss me now
What a way to lose your head
What a way to lose your head
What a way to lose your head
What a way to go to bed
What a way to get ahead
What a way to go to bed
With those thoughts inside your head
What a way to go to bed
What a way to go to bed

There's a place I see it in your head
Full of people baby
Can you see all those parts of me
Broken across the world

You say you miss me now
What a way to lose your head
You say you miss me now
What a way to lose your head
What a way to lose your head
What a way to lose your head
What a way to go to bed
What a way to get ahead
What a way to go to bed
With those thoughts inside your head
What a way to go to bed
What a way to go to bed

What a way to lose your head
What a way to lose your head
What a way to go to bed
What a way to get ahead
What a way to go to bed
With those thoughts inside your head
What a way to go to bed
What a way to go to bed

What a way to lose your head
What a way to lose your head
What a way to go to bed
What a way to get ahead
