ICT and Documentation

- [Web Technology and Learning Purposes](#)

Here below some of the materials used to study the multiple aspects of IT and ICT are provided.

The areas connected with ICT were investigated in order to keep personal training updated and, last but not least, in line with the most urgent needs of the information society and its implication with school context and reform.

- The ppt.presentation offers a summary of the assumptions and implications of e_learning.
  [e_Learning](#) (11601 KB)

  - The link provides a *ppt presentation of the position of the perspective e_Learner, new paradigm changes considered.
    [The future e-Learner](#) (1202 KB)

  - The materials provide reflection on the new tutoring figure and its implication with school and reform context.
