ICT and the Learning Process

- [38i_bibliografia su ipertesti_ rotta.htm](#)

The present section is meant to offer documentation concerning possible learning experiences integrating ICT and ordinary school work.

ICT really provides occasions for new and innovative learning experiences in that it meets the students modular way of thinking..

The learner may be supported in becoming self - conscious of personal difficulties and progress. He may choose ways to improve knowledge and skills on his own and behave according following his needs and interests in any educational contexts.

Constructivisms provides the theoretical framework for new learning and teaching practices in contemporary contexts.

Some examples of the new frontiers follow: the first one concerns a possible integration of ICT in ordinary learning and teaching experiences.

The Power Point is meant to provide a sample of the different tools learners and teachers may both rely on in their daily work.
