Session VI. Thursday April 2nd, 2009. CLIL

FIRST PART

Today's session is to be considered a follow up to the previous one. Students will be committed in the implementation of the different lessons that will together make up the CLIL Crosscurricular Project about The UNited States of America.

It is meant to have children and pupils learn about America from different points of view: the ones of the different contents selected to make up the project. >br> Today it is the time of Geography that will help children to be able to locate America within the larger map of Continents and provide them with the suitable input to be able to give and receive directions, discover America as a State made up of component countries.

[Anna's proposal](#)

The 7 Continents:

Europe, Antarctica, Asia, Africa, Australia, North America, South America
